

Date: December 3 2020

Dear our Valued Customer,

Notice: HTK Products Using TOYOBO "Planac"

We would like to thank you for your continued business with us.

We would like to announce that the UL Certification of the PBT plastic resin "Planac", purchased from TOYOBO Corporation, has been cancelled by Underwriters Laboratories (Hereinafter referred to as UL), a third-party safety science organization in the United States. On October 28, 2020, it was announced that the UL certification was revoked.

In response to this information, we would like to inform you of the impact of the withdrawal of UL's certification on our HTK products using this resin and our future response as follows below.

We sincerely apologize for the inconvenience and concern caused to our customers.

Details

1. Impact: Products using this resin are now classified as using non-UL certified resin materials (There are no HTK Connector products with this resin that have obtained UL certification for a Connector alone).
2. Target Resin product name: Planac BT-2230
3. HTK P/N's impacted: please refer to the list on the next page.
4. Future Plans:
HTK is planning to switch to UL-certified materials. Alternative materials are currently being selected and evaluated for use. HTK will inform you of the evaluation and the schedule for the Resin changeover after it is determined.

For more information, please contact at
Honda Tsushin Kogyo (HTK), Sales Promotion Group, Tokyo, Japan
